Blanket

Equivalent warmth to a medium-weight blanket, but softer and loftier - comfort you only get from a down comforter.

Summer Comforter

All the warmth of a thick blanket, yet light and puffy. Ideal for warm bedrooms or warm sleepers and can be used year-round.

Warmth Level 1

The warmth of one to two thick blankets, without the weight. Our most popular warmth level, typically used fall through spring.

Warmth Level 2

Provides the warmth of two to three thick blankets. Suitable for cold sleepers in cool bedrooms or warm sleepers in very cold climates.

Help your customers choose the perfect pillow

What makes a Cuddledown pillow so special?

- ❖ All our pillow fabrics are double-stitched, downproof, and certified safe from harmful chemicals.
- ❖ We fill them with the finest hypoallergenic down, down/feather blends, or synthetic - the same premium fills that we use in our down and synthetic comforters.
- ❖ All of our pillows are handmade in Portland, Maine - individually crafted for superior quality. In fact, it is not unusual for our pillows to maintain support for 15 years.

Here is a simple guide to help find the perfect Cuddledown pillow

Step one:

Choose from one of four firmness levels shown to the right.

Step two:

Choose your preferred level of quality.

We offer a range of fill powers including 900, 800, 700, and 600.

The higher the fill power, the higher the quality of the pillow. A pillow with 900 fill power will be the most resilient and last the longest while maintaining the same level of support for many years. Our down/feather blend pillows are ideal for the person who seeks a traditional feather pillow with a firmer texture. We also offer hypoallergenic synthetic pillows filled with premium synthetic that lofts and clusters like natural down.

Stomach

For stomach sleepers, extra soft to allow the head to sink to just the right level.

Soft

For back and side sleepers who want a softer pillow to cushion the head.

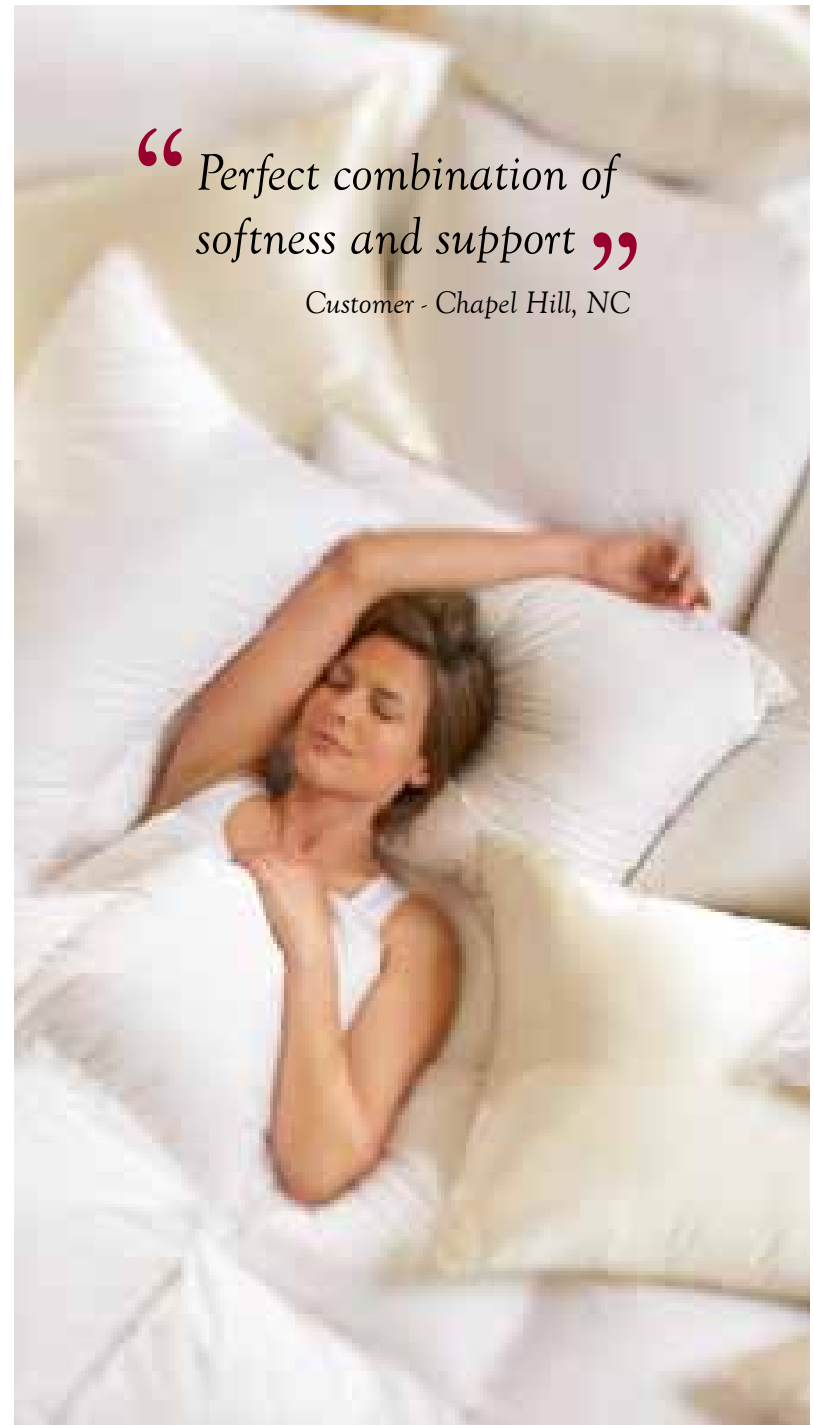

Medium and Overfilled

For back and side sleepers who want more support for the head and neck.

“Perfect combination of softness and support”
